

Covert and Undercover Operations School

Since 1986, IDEA has been providing training to law enforcement officers assigned to various covert and undercover operations. The primary focus of this 40 hour course, is on the officer, and what is to be expected in this aspect of police work.

Training will cover ethics, informant handling, use of electronics equipment, how to correctly deploy covert equipment in the field, use of undercover funds, and other topics essential for this job.

This course will lean heavily on a set of hands-on practical exercises conducted under the watchful eye of seasoned undercover agents. The learning experience from working agents is an invaluable experience every case agent should benefit from.

The Covert and Undercover Operations School is about you, the agent, and your ability to cope with the everyday stresses and perform in a safe and professional manner, while building strong prosecutable cases.

Whether your job is narcotics, organized crime, homeland security, or any investigation operating in a covert manner, this course is a must!

All registrations are non-refundable, but are transferrable.

Registration fee is \$100.
